<\/li><\/ul>Just remember, never skip over anything unless you can do it cleanly.

Don't make excuses to yourself and move on to the enxt lesson if you're tired of the current one.. Learn rock basics like power chords and riffs, plus some lead necessities like the blues scale and string bends.. Integrated guitar software tools, including an automatic guitar tuner, chord chart/dictionary, fingering charts, and metronome.. Over 40 Jam Tracks with slow and fast versions and a backing band to make learning fun.

The cost of this software is the cost of one 30 minute guitar lesson so it's definitely worth the money.. Everything works fine and is very clear to me, to play it on my guitar I think i'm going to love this.

The learning pace is very even and thought-out, you actually apply what you learned in the previous lesson to the current lesson, which gives you a good feeling of progress. The beat often includes other instruments playing the same notes as you are supposed to be, so not only do you sound awesome but you know exactly where you should be as you practice. Thanks to support steam as well! I have used this app now for more than 70 minutes and did not find any problem..

eMedia Instant Feedback technology highlights correctly played notes, which makes learning faster and easier.. emedia interactive rock guitar emedia intera
